Water management on clay soils. Greacen. 193
Workshop report on the ———. Gumbs. 189
Micro-hairs; ——— of citronella leaves and their relationship to components of citronella oil. Iruthayathas and Herath. 227
Milk; Genetic differences in ——— yield of home-bred and imported Ayrshire cattle in Sri Lanka. Ravindran and Buvanendran. 324
Mineral composition; ——— of autumn-winter stockpiled limpograss. Quesenberry and Ocumpaugh. 283
Mole drainage; Deep loosening and ——— on clay soils. Spoor. 97

Nitrogen; cropping system, growth and nodulation responses of beans to nitrogen in Tabasco, Mexico; Boucher and Espinosa. 279
Nitrogen; Effects of complete leaf shading during the late reproductive period on carbon and ——— distribution and seed production by nodule-dependent cowpea *(Vigna unguiculata)* plants. Neves *et al.*248
Nitrogenase; ——— activity in soils of Trinidad and Tobago. Collins and Donawa. 54
Nodulation; Cropping, system, growth and ——— responses of beans to nitrogen in Tabasco, Mexico. Boucher and Espinosa. 279

Oil; Micro-hairs of citronella leaves and their relationship to components of citronella ———. Iruthayathas and Herath. 227
Phosphate sorption isotherms and fertilizer response of ——— palms on Solomon Islands soils. Dandy *et al.* 49
Ontogeny; Effects of irrigation at critical stage of ——— of the banana *cv.* 'Robusta' on growth and yield. Holder and Gumbs. 221
Organic system; soil structure stability and the ——— in heavy montmorillonite clays. Turenne. 157
Oxisols; Wetting patterns and associated P-distribution under drip emitters in two ———. J.C.W. Keng, *et al.* 214

Pasture; A review of factors influencing successful ——— renovation. Pearen and Keoghan. 179
Pedological properties of soils; ——— and edaphological properties of the soils of two soil associations in the Morogoro area of Tanzania. Moberg *et al.* 139
Phaseolus vulgaris; see Beans
Phosphate; ——— sorption isotherms and fertilizer response of oil palms on Solomon Island soils. Dandy *et al.* 49
Phosphorus; Influence of P applications on maize yields in the Typic Paleudults in South Sumatra. Manuelpillai *et al.* 173
P-distribution; Wetting patterns and associated ——— under drip emitters in two Oxisols. Keng, *et al.* 214

Phytic acid; ——— content of maturing pods of cowpea (*Vigna unguiculata*) var. 'Dinner'. Omueti and Ojomo. 64
Plants; Gilgai in Australian Black Earths and some of its effects on ———. Thompson and Beckmann. 149
Planthoppers; Leafhoppers and ——— feeding on coconut palm in Jamaica. Eskafi. 289
Propagation; Sett production and germplasm maintenance through vine cuttings in yams. Akoroda and Okonmah. 311
Protein; Variation of storage root ——— content in winged bean, *Psophocarpus tetragonolobus* (L.) DC. Hildebrand *et al.* 59
Psophrocarpus tetragonolobus (L.) DC: *see* Winged bean

Red peppers; Development of a forced convection solar dryer for ———. Trim and Ko. 319
Reproduction; Influence of level of nutrition and season on the oestrus cycle rythmn and on fertility in buffaloes. Kaur and Arora. 274
Reproductive performance; Some factors affecting the ——— of White Fulani (Bunaji) cattle. Oyedipe *et al.* 231.
Rhizobium; Greenhouse and field evaluation of ——— strains nodulating groundnut (*Arachis hypogesa* L.). Graham and Donawa. 253
Rubber; botanical research on ———. Simmonds. 2
Rust; Importance of host factors of beans (*Phaseolus vulgaris*) on the control of ——— (*Uromyces appendiculatus*). Zulu and Wheeler. 235

Salinity; Aspects of the management of ——— on swelling clay soils in Jamaica. Shaw. 167
Savanna: Relationship of woody plants to herbaceous production in Nigerian ———. Sanford *et al.* 315
Seed; Effect of complete leaf shading during the late reproductive period on carbon and nitrogen distribution and ——— production by nodule-dependent cowpea (*Vigna unguiculata*) plants. Neves *et al.* 248
Production of viable ——— in gibberellic acid-treated tannia (*Xanthomosa sagittifolium* (L.) Schott) plants. Alamu *et al.* 333
Smut; Effect of sugar-cane ——— on yield and yield components of sugar-cane varieties in Tanzania. Msechu and Keswani. 243
Yield loss in sugar-cane due to culmiculous ——— infection. Whittle. 239
Soil; ——— physical properties and sugar-cane root and shoot growth on Lousiana banks after conversion from cambered beds field layout in Trinidad, WI. Simpson and Gumbs. 38
Soils; Nitrogenase activity in ——— of Trinidad and Tobago. Collins and Donawa. 54
Phosphate sorption isotherms and fertilizer response of oil palms on Solomon Islands ———. Dandy *et al.* 49
Soil erosion; Developing a simple yet practical method of soil-loss estimation. Elwell and Stocking. 43
Maize-weed competition and ——— in unweeded maize. Weil 207
Soil management; Clay soil structure related to ———. Warkentin. 82
Management of clay soils for erosion control. Lal. 133
Soil and water management features in Trinidad and Guyana. Gumbs. 76
Soil structure; Clay ——— related to soil management. Warkentin. 82
——— stability and the organic system in heavy montmorillonite clays. Turenne. 157
South Sumatra; Influence of P applications on maize yields in the Typic Paleudults in ———. Manuelpillai *et al.* 173
Storage; Experiments on the ——— of limes at tropical ambient temperature. Passam and Blunden. 20
Variation of ——— root protein content in winged bean, *Psophocarphus tetragonolobus* (L.) DC. Hildebrand *et al.* 59
Structure; Management of ——— on clays soils. Warkentin. 192
Stylosanthes: Key to species of ——— native to the Caribbean. Lazier. 334
Sugar; Influence of physical properties of clay soils on their management for ——— production in Guyana. Paul. 162
Sugar-cane; Effect of ——— smut on yield and yield components of ——— varieties in Tanzania. Msechu and Keswani. 243
Soil physical properties and ——— root and shoot growth on Louisana banks after conversion from cambered beds field layout in Trinidad, WI. Simpson and Gumbs. 38
Yield loss in ——— due to culmiculous smut infection. Whittle. 239

Tannia: Production of viable seed in gibberellic acid-treated ——— (*Xanthomosa sagittifolium* (L.) Schott) plants. Alamu *et al.* 333
Tanzania; Pedological and edaphological properties of the soils of two soil associations in the Morogoro area of ———. Moberg *et al.* 139
Tea; Genetic analysis of some morphological, physiological and biochemical characteristics associated with yield and quality. in ——— Pool. 9
Influence of mother leaf of cutting and of time and frequency of disbudding and decapitation of the new shoot on growth of young ——— (*Camellia sinensis* L.). Kathiravetpillai and Kulasegaram. 14
Tillage; Prescribing ——— for clay soils. Johnson *et al.* 92
——— management on clay soils. Spoor. 194
Trees; Relationship of woody plants to herbaceous production in Nigerian savanna. Sanford *et al.* 315
Trinidad; Importance of sugar-cane in the management of clay soils in ———. Cooper and Georges. 183
Soil and water management features in ——— and Guyana. Gumbs. 76
Tropics; Water management on clay soils in the ———. Unger. 110
Typic Paleudults; Influence of P applications on maize yields in the ——— in South Sumatra. Manuelpillai *et al.* 173

Uromyces appendiculatus; see Rust

Vigna unguiculata; see Cowpea
Virus; Indentification of resistance to cowpea severe mosaic ———. Fulton and Allen. 66

Water management; Soil and ——— features in Trinidad and Guyana. Gumbs. 76 ———
——— on clay soils. Greacen. 193
——— on clay soils. Luthin. 103
Weaning; Effect of plane of nutrition and ——— weights on the performance of male Arabi lambs. Latif *et al.* 327
Weed: Changes in ——— population following forest clearing in Oyo state, Nigeria. Moody. 298
Maize — ——— competition and soil erosion in unweeded maize. Weil. 207
Wheat; Effect of different maturity dates of preceeding cotton on growth, yield and yield components of ———. Kumar and Mayaki. 202
Wetting patterns; ——— and associated P-distribution under drip emitters in two Oxisols. Keng *et al.* 214
Winged bean; Variation of storage root protein content in ———, *Psophocarpus tetragonolobus* (L.) DC. Hildebrand *et al.* 59

Yams; Sett production and germplasm maintenance through vine cuttings in yams. Akoroda and Okonmah. 311
